Reviewer’s report

Title: Health related quality of life in patients in dialysis after renal graft loss. Effect of gender.

Version: 2 Date: 3 February 2014

Reviewer: Cynthia Gross

Reviewer’s report:

All my major concerns have been addressed in the revision.

Minor points -
1. First sentence in Abstract - replace has with have.
2. Methods in Abstract - logically, the statement regarding conduct of separate analyses by gender should follow the sentence about examining interactions with gender and loss.
3. Page 10 – older age associated with better cognitive function – comment on this anti-intuitive finding

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
