Reviewer’s report

Title: A systematic review of effectiveness and safety of different regimens of levonorgestrel oral tablets for emergency contraception

Version: 5 Date: 17 December 2013

Reviewer: Abdul Mazid

Reviewer’s report:

My comments and suggestion about the manuscript are stated below:
1. The Authors has clearly stated the objectives of the study.
2. The Review has summarized the pharmacokinetics data of levonorgestrel from different studies which seemed to be good collection and reference for future use of the drugs in pregnancy control.
3. These are some mistakes in spelling and language. Authors are suggested to correct those.

Opinion: The Manuscript seems to be suitable for publication in your esteemed journal
