Reviewer's report

Title: Breast Tuberculosis in North East IRAN: Review of 22 Cases

Version: 2 Date: 31 March 2014

Reviewer: Spyros Marinopoulos

Reviewer’s report:

Minor Essential Revisions
1. Manuscript should be checked for grammatical errors and language editing.
2. In the Summary section, surgical and pharmacological treatment results should be mentioned.
3. In the Summary section, the conclusions should include a statement based on the study results specifically for Iran.
4. In "Patients and methods" section, the authors should try to state clearly the methodology steps of diagnosis employed.
5. The part that refers to the initial choice of treatment (surgical or pharmacological) requires clarification as to what led you to the specific choice.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
