Reviewer’s report

Title: Correlation of breast cancer risk factors with HER-2/neu protein overexpression according to menopausal and estrogen receptor status.

Version: 1 Date: 14 November 2004

Reviewer: Christos Markopoulos

Reviewer’s report:

General

Even though results of such an analysis could be stronger with a larger sample size, the study is well designed, efficient statistical analysis has been performed and the paper is well written.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
