Reviewer's report

Title: A descriptive study of variables associated with obtaining nipple aspirate fluid in a cohort of non-lactating women

Version: 3 Date: 14 September 2006

Reviewer: Edward Sauter

Reviewer's report:

General
Changes are acceptable. No further revisions needed.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
