Reviewer’s report

Title: Seasonal variation in the incidence of preeclampsia and eclampsia in tropical climatic conditions.

Version: 2 Date: 27 August 2007

Reviewer: Per Magnus

Reviewer’s report:

General
The authors have now submitted a better paper. I would suggest that the word tertiary is omitted since it suggests that patients are referred.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
