Reviewer’s report

Title: DNA Microarray Data Integration by Ortholog Gene Analysis Reveals Potential Molecular Mechanisms of Estrogen-Dependent Growth of Human Uterine Fibroids

Version: 2 Date: 23 March 2007

Reviewer: James Segars

Reviewer’s report:

General
This in-silico analysis will be of interest to researchers in the uterine fibroid field.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
The revised manuscript incorporates revisions suggested.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
