Title: Correlates of intimate partner violence among pregnant women in Rwanda

Version: 3 Date: 18 August 2008

Reviewer: Ann L Coker

Reviewer’s report:

Revision #2
Major Revisions
How is it possible that 100% of women agreed to participate in this study? What written consent obtained?

If the authors used the Conflict Tactic Scale then reference this scale. Don't reference other studies that used this tool.

Include the variables you adjusted for when calculating adjusted ORs in the legend for the relevant table. The tables should stand on their own thus the legend would indicate those confounders included in the modeling.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
