Reviewer’s report

Title: Human lactobacilli as adjuvant given to patients with bacterial vaginosis reduce the recurrence rate after vaginal clindamycin therapy; a 6 month double blind randomized placebo controlled study.

Version: 4 Date: 13 July 2007

Reviewer: Mark A Klebanoff

Reviewer’s report:

General

My concerns have been met

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
