Reviewer’s report

Title: Laughter and Humor as Complementary and Alternative Medicine to Dementia Patients

Version: 1 Date: 2 February 2010

Reviewer: Katsuyoshi Mizukami

Reviewer’s report:

The paper reported beneficial effects of laughter and humor on patients with dementia. This is an interesting and informative paper, and I have no serious criticisms on it.
If data on the laughter or humor therapy for dementia patients has been reported, it would be better to describe it briefly.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
