Reviewer's report

**Title:** Use of complementary and alternative medicine by those with a chronic disease and the general population - results of a national population based survey

**Version:** 2  **Date:** 22 September 2010

**Reviewer:** Michael Goldstein

**Reviewer's report:**

The paper is certainly improved compared to the earlier version. Unfortunately, most of the more significant problems I had with the manuscript could not be addressed due to limitations of the data set. So...I still see the paper as adding relatively little to the existing literature, but certainly don't want to stand in the way if the other reviewers are now satisfied.

**Level of interest:** An article of limited interest

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I have no competing interests.
