Reviewer's report

Title: Differences in the quality of interpersonal care in complementary and conventional medicine

Version: 3 Date: 22 July 2010

Reviewer: Aslak Steinsbekk

Reviewer's report:

The manuscript is greatly improved. I only have a few discretionary revisions:
The hypothesis could be explicitly commented in the discussion/conclusion.
The connection between length of follow up and outcome could be commented in limitations - ie that it is less likely that chronic conditions resolves during one month.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
