Reviewer’s report

Title: The use of economic evaluation in CAM: an introductory framework.

Version: 1 Date: 8 June 2010

Reviewer: Bonnie Lind

Reviewer’s report:

Major Compulsory Revisions
This is an interesting article, and the ideas it contains are worthy of publication. However, prior to publication I would like to see major changes in 2 areas:

1. Reorganize the paper into the standard Background - Methods - Results - Discussion sections
2. In the Results section, present real-world examples. The current numbers shown as examples seem arbitrary and made-up, and it would be helpful to see some real examples.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
