The authors improved the manuscript but I am still unsure about the indented audience and scope of this article. Most topics are only briefly discussed and the methods rely on standard economic procedures that may not always be suited for the requirements of CAM. However, my concerns are most likely related to problems inherent for this type of publication. The article is therefore acceptable for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
