Reviewer's report

Title: Mood color choice helps to predict response to hypnotherapy in patients with irritable bowel syndrome

Version: 1 Date: 1 August 2010

Reviewer: Shinobu Nomura

Reviewer's report:

Discretionary Revisions

This paper is interesting and important in application of HT practice on IBS patients. If you can, I hope you analyse the differences of color images among IBS subtypes of Rome II or III criteria and the gender differences.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
