Reviewer's report

**Title:** In vitro activities of natural products against oral Candida isolates from denture wearers

**Version:** 4  **Date:** 10 November 2011

**Reviewer:** Marie-Aleth Lacaille-Dubois

Reviewer's report:

After reading carefully the revised manuscript, I have seen that the authors have taken into account my comments. But they remain small minor points which needed some additional explanations.

They are listed below:

1) the sentence line 29-31 lacks of clarity when we compare with the results I would write: but to a lesser extent..... or: but not...... authors????

2) line 81 from XX: it seems that from XX should be deleted. authors????

3) line 91 fluconazole should be followed by: (as a positive control)

4) line 228-229 the sentence lacks of clarity and has to be revised (same remark as above line 29)
