Reviewer's report

Title: Bioprotective properties of Dragon’s blood resin: In vitro evaluation of antioxidant activity and antimicrobial activity

Version: 2 Date: 7 January 2011

Reviewer: Cesar A Catalan

Reviewer's report:

I have read both the revised version of the above referenced manuscript and the letter describing the changes made. I have read also the comments from the other two reviewers.

In my opinion the original criticisms from all the three reviewers have been satisfactorily answered and the corresponding changes have been incorporated to the ms. I consider that this revised version is now ready to be accepted for publication in BMC Complementary and Alternative Medicine.
