Reviewer's report

Title: Effects of Green Tea Catechins and Theanine on Preventing Influenza Infection among Healthcare Workers: A Randomized Controlled Trial

Version: 2 Date: 22 January 2011

Reviewer: Gang Wang

Reviewer's report:

Dear Editors of BMC Complementary and Alternative medicine,
After reviewing this revision, I think that, if authors provide the figure of the time to the first influenza infection as the secondary outcome, it is good enough. If so, it should be acceptable for publication.
