Reviewer's report

Title: Safety, tolerability, and impact on allergic inflammation of autologous E.coli autovaccine in the treatment of house dust mite asthma - a prospective open clinical trial

Version: 2 Date: 10 February 2011

Reviewer: Margarete Focke

Reviewer's report:

I think the paper is acceptable now, although I still believe it would be of great value to have more good characterized patients, but the data are surely interesting for people working in this field of interest

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
