Reviewer’s report

Title: Efficacy of methylsulfonylmethane supplementation on osteoarthritis of the knee: a randomized controlled study

Version: 1 Date: 20 January 2011

Reviewer: Edzard Ernst

Reviewer’s report:

This is a well-designed and well-reported RCT. I have no major criticism.

Minor:
1) Who funded the study?
2) Perhaps you could elaborate on the effect size relative to several standard treatments
3) OA is not used consistently

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
