Reviewer's report

Title: An Evaluation of the Completeness of Safety Reporting in Reports of Complementary and Alternative Medicine Trials

Version: 1 Date: 12 May 2011

Reviewer: Zhaoxiang Bian

Reviewer's report:

1. Is it possible to have the data to analyze the linkage between the endorsement of CONSORT for Harms and quality of reporting of Harms?

2. Although the author mentioned in their methodology that they compared the percentage of words in the body of the text given to safety reporting and the percentage of words in the body of the text given to author affiliations, it is problematic. Authors should provide some discussion about this in their limitation.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
