Reviewer’s report

Title: BACE1 inhibitory activity of fungal endophytic extracts from Malaysian medicinal plants

Version: 4 Date: 26 July 2011

Reviewer: X Shen

Reviewer’s report:

In the revised manuscript, the authors identified four active fungal isolates of Cytospora rhizophorae. It seems that the manuscript might provide some useful information for BACE1 inhibitor discovery from endophytic fungus. I think the present manuscript may be accepted for publication in BMC Complementary and Alternative Medicine after minor revision.

Minor comment:
In page 6, line 15, the “period” must be changed to “comma”.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
