Reviewer’s report

Title: Immunological response in mice bearing LM3 breast tumor undergoing Pulchellin treatment

Version: 2 Date: 2 July 2012

Reviewer: Jong-Hwei Pang

Reviewer’s report:

I have reviewed the revised manuscript in which the authors have made some improvement. However, the major concern about this manuscript is that the treatment did not have any effect on reducing the tumor. Therefore, all the changes reported in this manuscript and the conclusion made by the authors became less meaningful.
