Reviewer’s report

Title: Hepatoprotection with chloroform extract of Launaea procumbens against CCl4 induced injuries in rat

Version: 1 Date: 25 July 2011

Reviewer: Amegnona Agbonon

Reviewer’s report:

Methodology:
1- The authors must specify the place where chemicals were purchased
2- In the Experimental design, it is not necessary to specify the days like Monday...

Discussion:
3- Authors need to revise the sentence as follow: Co-administration of various doses of L. procumbens markedly erased.....activities
4- Repetition of the word quantitatively in: Our results showed that.....quantitatively and quantitatively.......assay banding pattern.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
