Reviewer's report

Title: Prevalence and Determinants of Complementary and Alternative Medicine use among Infertile Patients in Lebanon: a cross sectional study.

Version: 1 Date: 5 June 2012

Reviewer: Connie Weaver

Reviewer's report:

Major Compulsory Revisions

The author must respond to these before a decision on publication can be reached. For example, additional necessary experiments or controls, statistical mistakes, errors in interpretation.

1. How was it determined that participants used functional foods for the purpose of infertility rather than just part of the diet?

Minor Essential Revisions

The author can be trusted to make these. For example, missing labels on figures, the wrong use of a term, spelling mistakes.

2. Can the authors elaborate on the nature of side effects?

Discretionary Revisions

These are recommendations for improvement which the author can choose to ignore. For example clarifications, data that would be useful but not essential.

3. None

Please note that both the comments entered here and answers to the questions below constitute the report, bearing your name, that will be forwarded to the authors and published on the site if the article is accepted.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
