Reviewer's report

Title: Acute toxicity and the 28-day repeated dose study of a Siddha medicine "Nuna Kadugu" in rats

Version: 4 Date: 26 April 2012

Reviewer: Nicola Stagg

Reviewer's report:

Major compulsory revisions -
I do not like the title change that was recommended by one of the other reviewers. These are two toxicology studies, acute and 28-day. It is not an acute toxicity and the 28-day repeated dose study. That doesn't make sense. I would recommend reverting to the original title.

None of my comments were addressed only the scanned revisions I suggestions.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

None of my comments were addressed. The only thing they addressed was the scanned revision of the manuscript
