Reviewer's report

Title: Anxiolytic effects of compound Valeriana jatamansi Jones in mice

Version: 3 Date: 11 July 2012

Reviewer: Choon-Gon Jang

Reviewer's report:

Major Compulsory Revisions

- Authors explained that they used compound of 4 different herbal drugs including VJ not as an extract. However in methods, author explained that they used ethanol extracts. It is not clear that they use powder or extract. If they use extract, 4.8g/kg is too high dose.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.
