Reviewer's report

Title: Anxiolytic effects of compound Valeriana jatamansi Jones in mice

Version: 3 Date: 27 June 2012

Reviewer: Oliver Grundmann

Reviewer's report:

The revised manuscript submitted by You et al. includes significant changes and clarifications that address the issues that the reviewers raised.

I support publication of the manuscript after careful consideration of the diction which has been improved but at times still misses correct spelling and grammar (there are a number of sentences where the word "been" has been used more than once). This is a minor but essential revision before publication.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
