Reviewer's report

**Title:** Prakriti (Ayurvedic concept of constitution) and variations in platelet aggregation

**Version:** 2  **Date:** 11 November 2012

**Reviewer:** Alex Hankey

**Reviewer's report:**

General
This article has been well-revised by the authors and is now in excellent shape.

Minor Essential Revision
The article should be published provided that the one remaining blight is removed - the reference to doshas as 'humors' under 'Background'. This is derogatory to modern understanding of the field, such as 'Systems Ayurveda'. Besides it is invalidated by the authors' own words two lines below:
How can a 'humor' be 'responsible for cellular or sub-cellular metabolism'?

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
No competing interests
