Reviewer's report

Title: Prakriti (Ayurvedic concept of constitution) and variations in platelet aggregation

Version: 2 Date: 12 October 2012

Reviewer: Gerard Bodeker

Reviewer's report:

The paper is significantly improved & will be an important landmark in advancing the Ayurvedic concept of body types as understood from the perspective of science. One minor correction - a reference to Ayurvedic texts is missing on page 6. A suggestion to the investigators would be to preserve their samples in future studies as re-analysis in the light of new science & even challenges to their findings can always be a possibility.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
