Reviewer’s report

Title: Cardioprotective Effect of Danshen and Gegen Decoction on Rat Hearts and Cardiomyocytes with Post-ischemia Reperfusion Injury

Version: 2 Date: 30 May 2012

Reviewer: Min Li

Reviewer’s report:

This manuscript studied the mechanism of anti-injury effect from ischemic reperfusion of Danshen and Gegen decoction. It is interesting.

Major Compulsory Revisions: please give the rationale of choosing the ischemia and reperfusion Langendorff heart model, instead of in vivo models.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
