Reviewer's report

Title: Frankincense essential oil prepared from hydrodistillation of Boswellia sacra gum resins induces human pancreatic cancer cell death in cultures and in a xenograft murine model

Version: 1 Date: 23 June 2012

Reviewer: RAJANI MATHUR

Reviewer's report:

The authors have attempted to study the optimal condition for preparing frankincense essential oil that possesses potent anti-tumor activity. In-vitro activity has been correlated with phytochemical constituents. The results are well-defined. Further, clinical results need to be defined in future studies.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
