Reviewer's report

Title: Phytochemical studies and antioxidant activity of two South African medicinal plants traditionally used for the management of opportunistic fungal infections in HIV/AIDS patients.

Version: 1 Date: 9 March 2012

Reviewer: Helen Skaltsa

Reviewer's report:

Minor Essential Revisions
These are recommendations for improvement which the author should not ignore

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
