Reviewer’s report

Title: Development and Implementation of an Herbal and Natural Product Elective in Undergraduate Medical Education

Version: 1 Date: 6 March 2012

Reviewer: Lisa Wilhelm

Reviewer’s report:

I enjoyed reviewing this article by KK. It is a well written description of an important topic. With the widespread use of H/NP it is vitally important for prescribers to have appropriate clinical information about these products and KK describes a novel aproach to educating physicians around this topic.

As a discretionary suggestion I would like to see more discussion around the need to view H/NP as ‘medications’ in both the physician and patient context.

Otherwise a very nice article, I have no other revisions.

Thank you!

Level of interest: An article of importance in its field
