Reviewer’s report

Title: Antimicrobial activities of the methanol extract and compounds from the twigs of Dorstenia mannii (Moraceae)

Version: 2 Date: 16 May 2012

Reviewer: Farrukh Aqil

Reviewer’s report:

Although authors have answered all queries raised by other reviewers, I still feel that the data presented in this manuscript is a result of a single experiment and not good enough to publish as full length article. However, can be consider as short communication, if BMC has this category.
