Reviewer's report

Title: Acupuncture for the Treatment of Tinnitus: A Systematic Review

Version: 4 Date: 1 March 2012

Reviewer: Gerhard Andersson

Reviewer's report:

Dear authors

This is a well written ms and the results are convincing. My only recommendation is that the authors could mention that there are evidence-based treatments for tinnitus, most important psychological treatments. Otherwise the message to people with tinnitus will be much pessimistic.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No conflict of interest
