Reviewer's report

Title: Anti-inflammatory, antioxidant, and antimicrobial activities of Cocos nucifera var. typica

Version: 1 Date: 25 November 2012

Reviewer: Sasitorn Chusri

Reviewer's report:

Major Compulsory Revisions
1. The question posed by the authors is not well defined. Since the authors aimed to study if Cocos nucifera var. typica has the anti-inflammatory and antimicrobial activities that already reported in other varieties. Therefore the activities of Cocos nucifera var. typical should be done or discussed in comparison with other varieties.

2. The methods of this manuscript are appropriate and well described, Do the authors performed the anti-inflammatory of Cocos nucifera var. typical in vitro before applied in animal model?

3. The discussion on biological activities of other varieties of Cocos nucifera should be added. The conclusions should be focused on the comparison of biological activities of Cocos nucifera var. typical and other varieties more than anti-MRSA activities.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
