Reviewer's report

**Title:** Effects of a Brief Qigong-based Stress Reduction Program (BQSRP) in a distressed Korean population: a randomized trial

**Version:** 2  **Date:** 29 January 2013

**Reviewer:** Hector W.H. Tsang

**Reviewer's report:**

This is the revision of the manuscript. I found that the authors have satisfactorily addressed most of my concerns in the earlier round of review. Although there are obvious limitations in the preliminary report, the results are still interested to many of our readers given that mind-body exercise has been receiving more and more attention in the area of CAM. I would recommend for publication hoping that this will arouse more research on qigong in the future.
