Reviewer’s report

Title: In-vitro evaluation of selected Egyptian traditional herbal medicines for treatment of Alzheimer diseases

Version: 1 Date: 23 January 2013

Reviewer: Nahla NA Abdel-Azim

Reviewer’s report:

- This research point is highly interesting and well identified by the authors.
- The research point is an original one and is concerned with many Egyptian plants for the first time.
- The represented data are sounding and well controlled.
- Data interpretation is fine but only some references need to be added as mentioned in the attached revised manuscript.
- The experimental work is reproducible and clearly described including in vitro studies and their statistical analysis.
- As mentioned in the revised manuscript only minor corrections are required.
- No ethical issues to be raised.

1. Minor Essential Revisions
   Please see the attached revise

2. Discretionary Revisions
   The authors should write full plant names if they are mentioned for the first time throughout this text.
   Please see the attached revised manuscript

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
