Reviewer's report

Title: Antibacterial Activities of Selected Edible Plants Against Multidrug-Resistant Gram-negative bacteria

Version: 1 Date: 2 April 2013

Reviewer: Mainen Moshi

Reviewer's report:

Minor Essential Revisions

The manuscript is largely well written but there a few minor editorial mistakes that need to be corrected.

e.g. 1. In the abstract two latin binomials have been written with a fullstop in between (Aframomum.alboviolaceum)
2. Again in the abstract "Ocimum gratissimum and Tamarindus indica" are all connected as one word.
3. There are a few more such minor editorial mistakes, which the authors can be trusted to quickly correct.
4. The last sentence under Discussion section is not clear. It needs to be revisited so as to make clear the message that is being conveyed.
5. I wonder if the conclusion could be linked to the point of view that these plants are used as food. What are the implications in terms of controlling MDR bacteria encountered in foods?

4. Reference No. 7 is incomplete:
5. Reference No.25: The name of the author is "Doughari JH"

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
