Reviewer's report

Title: Guava pomace: a new source of anti-inflammatory and analgesic bioactives.

Version: 1 Date: 19 May 2013

Reviewer: Ruchi Badoni Semwal

Reviewer's report:

Major Compulsory Revision

1. Since, the evaluated bioactivity as well as chemistry of the plant is already known and the authors selected a well known approach, in which nothing is new except the raw material. How the work is more exciting as compare to that of previously published?
2. Beside these issues, how the authors determined doses up to 1000mg/kg, where are the results from toxicity or LD50?
3. There are few grammatical errors to be improved.
4. The discussion part is not adequate, include the comparison with previously reported researches.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
