Reviewer's report

**Title:** Effects of organic extracts of six Bangladeshi plants on in vitro thrombolysis and cytotoxicity

**Version:** 3  **Date:** 7 July 2012

**Reviewer:** DZOYEM Jean Paul

**Reviewer's report:**

REVIEWER'S REPORT
-------------------

1- Major Compulsory Revisions
- Discussion is wordy. Authors should explore the significance of their results instead of the citations and discussion of published literature.
- The whole MS require major language editing.

2- Minor Essential Revisions

Abstract:
Page 2, line 10: “An in vitro thrombolytic model was used” this sentence is vagueness, so the method used should be clearly described.
Page 3, line 1-6: Authors have not made any conclusion from the cytotoxicity study.

Background
Page 5, line 1: Thrombolyti activity of plants not documented

Methods
Page 6, line 18: Plant materials should be dried before grind.
Page 6, line 19: 7 days soaking is too long. Can authors justify this long time.

**Level of interest:** An article of limited interest

**Quality of written English:** Not suitable for publication unless extensively edited

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
