Reviewer's report

**Title:** Activation of Amygdala Opioid Receptors by Electroacupuncture of Feng-Chi (GB20) Acupoints Exacerbates Focal Epilepsy

**Version:** 2 **Date:** 8 October 2013

**Reviewer:** Fan-Gang Meng

**Reviewer's report:**

Discretionary Revisions:

The authors have been confirmed the reliability of the rat focal epilepsy model and elucidated the stimulus parameters which are related to in the discussion paragraphys. Also, the different results between their findings and the documentation in the Lingshu Jing expounded. Furthermore, the figures below were designed well and illustrated the Experimental protocol clearly. If these figures can be inserted into the paragraphys which are associated with, the article may be better.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
