Reviewer’s report

Title: In vitro Anti-mycobacterial activity of Selected Medicinal Plants against Mycobacterium tuberculosis and Mycobacterium bovis Strains

Version: 2 Date: 7 October 2013

Reviewer: Oya Unsal Tan

Reviewer’s report:

The manuscript entitled "In vitro Anti-mycobacterial activity of Selected Medicinal Plants against Mycobacterium tuberculosis and Mycobacterium bovis Strains" by Abdella Gemechu and coworkers describes the antimycobacterial activities of five Ethiopian medicinal plants.

Although all extracts were found less active than rifampicin, extracts of leaves of A. abyssinica and E. camaldulensis showed interesting antimycobacterial activity.

In my opinion, this manuscript is suitable for publication in this journal after correcting the symbols and units "such as degree, percent etc" according to the journal guide.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
