Reviewer's report

Title: Effect of oral administration of ethanolic extract of Vitex negundo on thioacetamide-induced nephrotoxicity in rats

Version: 1 Date: 4 July 2013

Reviewer: Necla Koçak-Toker

Reviewer's report:

This is a well planned study. Its findings would be important to those with closely related research interests. However English is poor. There are serious grammar mistakes. It needs corrections before being published.

Information concerning SOD and CAT present in Results section should be placed in Discussion section. It makes the Results section unnecessarily long.

It can be accepted for publication after minor corrections.
