Reviewer's report

Title: Ardipusilloside I induces apoptosis via regulating Bcl-2 family proteins in human mucoepidermoid carcinoma Mc3 cells

Version: 2 Date: 26 September 2012

Reviewer: Bungorn Sripanidkulchai

Reviewer's report:

The authors must explain why the incubation was changed to be 48 h and still get the results in the same Figure as at 24h of incubation. This is contrast to the finding that Ardipusilloside I affected Mc3 cells as dose and time-dependent manner(Fig 2,4,5,6,7).

The figure legend should describe a, b, c, d. (Fig 2,4,6).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
