Reviewer’s report

Title: Usage patterns and adverse experiences in traditional Korean medicine: results of a survey in South Korea

Version: 4 Date: 16 February 2013

Reviewer: boli zhang

Reviewer’s report:

Discretionary Revisions

The authors have made great effort to revise the manuscript which has become better. There are several types of traditional therapies used in Korea; some of them might be (not) unique to Korean. In the manuscript, it seems unclear about two concepts: ‘traditional Korean medicine’ and ‘traditional medicines used in Korea’.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
