Reviewer’s report

Title: Antifungal and antibacterial activity and chemical composition of polar and non-polar extracts of Athrixia phylicoides determined using bioautography and HPLC

Version: 2 Date: 19 April 2013

Reviewer: Bibi Sedigheh Fazly Bazzaz

Reviewer’s report:

(1) Keywords should rearrange in alphabetical orders.
(2) Please specify the condition of probe for sonication. (Methods, preparation of extracts)
(3) Culture media’s factory must be specified. (Methods, Bacterial and fungal cultures) (4) When writing the genus and species of bacteria, fungi or plant, either in abstract or in the body of paper, for the first time must be written complete, in the next times the abbreviation of the genus must be written. Also, if two words start by the same letter, (Candida and Criptococcus) the first syllabus must be written. Here this rule is not considered through the manuscript.
(5) In tables or figures the comment (4) should be considered (e.g. in table 3).
(6) In the legend of table 3, 1-4 and 5 should be explained (different extract).
