Reviewer's report

Title: Anti/protozoal activity of aporphine and protoberberine alkaloids from Annickia kummeriae (Engl. & Diels) Setten & Maas (Annonaceae)

Version: 1 Date: 6 November 2012

Reviewer: didem sohretoğlu

Reviewer's report:

minor essential revisions
Did first author work in all 6 departments indeed???
I think Enantia kummeriae also added as a keyword
The same authors has a manuscript about the title plants same activity. So, it should be mentioned in the text and cited:
In page 4, material and methods, general experiment procedures, solvent used for NMR anlysis should be written.
Meaning of abbreviation HSCCC should be explain
In page 8,both Cortes & Davoust, 1990, Cortes et al. 1990 were cited but in the reference list only Cortes & Davoust, 1990 is present.So, it should be checked?
In tables, there is no need to write first letters of compounds names.
In my opinion, NMR data of some compounds should be given. It is up to author, which compound or compounds data they will give.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
