Reviewer's report

Title: Hexane fraction of Ardisia crispa Thunb A.DC root inhibits inflammation-induced angiogenesis

Version: 2 Date: 15 October 2012

Reviewer: Umesh K K Jain

Reviewer's report:

Major Compulsory Revisions

1. In RESULTS: Further separation of ACRH yielded about 2.3 g (38.38% w/w) of QRF. Here the % value seems incorrect. (In our previous above remark, I would like to clarify that in manuscript amount taken of ARCH is 5 g in text and it is 6 g in Fig. It should be either 5 or 6 and so the % accordingly.

2. Minor Essential Revisions
   Nil

3. Discretionary Revisions
   Nil

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
